

Rounding Practice

In this section, round the prices to the nearest whole cent.

1. \$3.2496848

3. \$22.004348

2. \$15.5058673

4. 1.79324964

In this section, round the prices to the nearest whole dollar.

5. \$22.95

7. \$69.63

6. \$1.02

8. \$364.34

9. Four people are going to the movies together. Their tickets each cost \$9, and together they bought 2 tubs of popcorn at \$6.35 each and 2 sodas at \$4.22 each. How many whole dollars will each person need to bring to cover the cost?

10. A man goes to fill up his car with gas and keeps a record of how much it costs each time. After five times he looks to see how much it costs him to fill up his gas tank on average. The numbers are \$32.89, \$30.06, \$28.75, 36.59, and \$34.23. What is the precise average cost of a tank of gas for him? About how much does it take him to fill up (round to the nearest \$5).
